

# GOG – 0244 Training

## GOG-0244 NOW OPEN

The Lymphedema and Gynecologic Cancer (LEG) Study: Incidence, Risk Factors, and Impact

### **Purpose of Study**

To prospectively estimate the incidence of lower extremity lymphedema in patients undergoing radical surgery with a concurrent lymphadenectomy for a gynecologic malignancy

**Friday, July 11, 2014**

**10:00 –12:00 pm**

### **Study Chair:**

**Richard Barakat,  
M.D.**

**barakatr@MSKCC.ORG**

**219-639-2453**

**Please register online when registering for the NRG meeting or on site at the NRG registration desk.**

### **Who should attend this training session?**

- Individuals who will be involved in leg measurements for this study\*
- Individuals who need to be familiar or trained in leg measurement
- Physicians, Data managers, nurses, and other study staff
- Anyone interested in lymphedema

\*Training is required for any institution participating in this study

### **What training will be included in this session?**

- GOG-0244 study designs
- “Hands on” leg measurement training will be available with live models
- Overview of the study instruments and data collection time points
  - Lymphedema Symptom Assessment (GCLQ) and Lower Extremity Functional Scale
  - Patient reported outcomes (PROs) of QOL and Psychological Adjustment
