

NRG Oncology Digital Health Workshop

Friday, July 19, 2019

7:00-8:00 am

*Philadelphia Marriott Downtown
Philadelphia, PA*

NRG
ONCOLOGY

Advancing Research. Improving Lives.™

SESSION CHAIR:

Adam Dicker, MD, PhD, FASTRO, FASCO
Thomas Jefferson University

SPEAKERS:

John Gannon
Blue Spark Technologies
President & CEO

John Gannon serves as president and chief executive officer (CEO) of Blue Spark Technologies. Mr. Gannon brings with him a deep understanding of the technology industry, as well as the energy and drive that is leading Blue Spark Technologies into the commercialization of its innovative, patented products. John is also co-inventor of Blue Spark's newest product TempTraq®.

Julian Hong, MD, MS
University of California, San Francisco

Julian Hong is a recent graduate of the Duke Radiation Oncology Residency Program and will be joining UCSF as an Assistant Professor in Radiation Oncology and the Bakar Computational Health Sciences Institute in Fall 2019. His research focuses on developing and deploying actionable analytics in oncology, including machine learning and artificial intelligence for prediction and decision making, data extraction and natural language processing, and imaging analytics.

Sanjay Aneja, MD
Yale School of Medicine

Dr. Aneja is an Assistant Professor in the Department of Therapeutic Radiology at Yale School of Medicine and at the Department of Statistics and Data Science at Yale College. In addition to his clinical practice, Dr. Aneja serves as the co-director for the Yale Center for Computational Health and teaches two undergraduate courses at Yale College in the areas of artificial intelligence and medical data analysis.
